

Creating you new server

Step 1: Go to <https://alienhost.net/index.php#header> and Select the game planet (7 Days to die).

Step 2: After selecting your planet, go to the region option. From here you can pick which region you would like to host your server from. Always make sure you select the region with the lowest ping to you.

Step 3: After selecting your region, head down to the **Ship Configuration**. And, setup how much **Ram/CPU/Storage** you want to have on your server.
